Height: 24 inches

Spread: 24 inches

Spacing: 16 inches

Sunlight: ○ ◐

Hardiness Zone: 7b

Other Names: Silver Ragwort, syn. Jacobaea

**Description:**

An interesting and beautiful variety producing silver-gray, deeply lobed, fuzzy foliage; grown primarily for foliage, trim flower stems to promote new basal growth; excellent for edging, containers, or massed as groundcover

**Ornamental Features**

Cirrus Dusty Miller's attractive tomentose lobed leaves emerge white in spring, turning silver in color throughout the season on a plant with an upright spreading habit of growth. It features dainty clusters of yellow daisy flowers with gold eyes held atop the stems from early to late summer.

**Landscape Attributes**

Cirrus Dusty Miller is an herbaceous perennial with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and usually looks its best without pruning, although it will tolerate pruning. It has no significant negative characteristics.

Cirrus Dusty Miller is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting
- Hanging Baskets

**Planting & Growing**

Cirrus Dusty Miller will grow to be about 24 inches tall at maturity, with a spread of 24 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 16 inches apart. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.

Cirrus Dusty Miller is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
