Height: 28 inches

Spread: 24 inches

Sunlight: ○ ◐

Hardiness Zone: 5b

Other Names: New Zealand Hair Sedge

Description:

Ornamental olive green colored foliage, rising up to distinctive red-orange shades, carried all season long; great in a moist border in shade or sun, does not like to dry out; more orange in full sun locations

Ornamental Features

Prairie Fire Sedge is primarily valued in the garden for its cascading habit of growth. Its attractive grassy leaves are olive green in color with showy orange variegation and tinges of red. The foliage often turns brown in fall.

Landscape Attributes

Prairie Fire Sedge is an herbaceous evergreen perennial with a shapely form and gracefully arching foliage. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It has no significant negative characteristics.

Prairie Fire Sedge is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Groundcover
- Naturalizing And Woodland Gardens
- Container Planting

Planting & Growing

Prairie Fire Sedge will grow to be about 28 inches tall at maturity, with a spread of 24 inches. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 7 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Prairie Fire Sedge is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
