Height: 6 inches

Spread: 10 inches

Spacing: 8 inches

Sunlight:

Hardiness Zone: 4b

Other Names: Border Pinks, Cheddar Pinks

Group/Class: Mountain Frost Series

**Description:**

This wonderful fragrant variety has a sweet aroma; frilly flowers of white, with v eye zones, over gray-green foliage; great for borders, annual beds, and containers

**Ornamental Features**

Mountain Frost White Twinkle Pinks is smothered in stunning fragrant white frilly flowers with a hot pink ring at the ends of the stems from mid spring to early fall. The flowers are excellent for cutting. Its attractive narrow leaves remain bluish-green in color with hints of silvery blue throughout the year.

**Landscape Attributes**

Mountain Frost White Twinkle Pinks is an herbaceous evergreen perennial with a mounded form. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees and butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Mountain Frost White Twinkle Pinks is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Container Planting

**Planting & Growing**

Mountain Frost White Twinkle Pinks will grow to be only 5 inches tall at maturity, with a spread of 10 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 8 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant should only be grown in full sunlight. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Mountain Frost White Twinkle Pinks is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
