Height: 3 feet

Spread: 4 feet

Sunlight: ○ ◐

Hardiness Zone: 6a

Description:

This compact shrub presents red to gold new foliage that matures to dark green, with creamy yellow variegation; dazzling bronze-rose fall color; tidy, mounded habit and tubular white flowers in spring make this shrub a welcome addition to smaller spaces

Ornamental Features

Gold Dust Abelia features dainty clusters of lightly-scented white tubular flowers at the ends of the branches from late spring to late summer, which emerge from distinctive rose flower buds. It has attractive yellow-variegated dark green foliage with hints of coppery-bronze which emerges gold in spring. The glossy oval leaves are highly ornamental and turn outstanding shades of rose and in the fall, which persists throughout the winter.

Landscape Attributes

Gold Dust Abelia is a multi-stemmed evergreen shrub with a shapely form and gracefully arching branches. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting birds, bees and butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Gold Dust Abelia is recommended for the following landscape applications;

403 Green Village Road
Green Village, NJ 07935

- Mass Planting
- General Garden Use
- Container Planting

Planting & Growing

Gold Dust Abelia will grow to be about 3 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in full sun to partial shade. You may want to keep it away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.

Gold Dust Abelia makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
