Height: 4 feet

Spread: 4 feet

Sunlight: ○ ◐

Hardiness Zone: 5a

Other Names: French Hydrangea, Bigleaf Hydrangea

Description:

An elegant lace-cap style of hydrangea with a big plus - spectacularly variegated foliage of deep green and pure white; the combination of flowers and foliage is outstanding over a long period; flower heads often develop soft shades of pink or blue

Ornamental Features

Light-O-Day Hydrangea features bold white lacecap flowers with shell pink centers at the ends of the branches from early to mid summer. The flowers are excellent for cutting. It has attractive white-variegated forest green foliage with hints of grayish green. The glossy pointy leaves are highly ornamental but do not develop any appreciable fall color.

Landscape Attributes

Light-O-Day Hydrangea is a multi-stemmed deciduous shrub with a more or less rounded form. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This shrub will require occasional maintenance and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It has no significant negative characteristics.

Light-O-Day Hydrangea is recommended for the following landscape applications;

403 Green Village Road
Green Village, NJ 07935

Planting & Growing

Light-O-Day Hydrangea will grow to be about 4 feet tall at maturity, with a spread of 4 feet. It tends to be a little leggy, with a typical clearance of 1 foot from the ground. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in full sun to partial shade. You may want to keep it away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It requires an evenly moist well-drained soil for optimal growth. It is not particular as to soil type, but has a definite preference for acidic soils. It is highly tolerant of urban pollution and will even thrive in inner city environments, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone in both summer and winter to conserve soil moisture and protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America.

Light-O-Day Hydrangea makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
